

HackTheChain 2.0

HackTheChain 2.0 is the biggest hackathon in Kota City, presented by the Indian Institute of Information Technology Kota (IIIT Kota) in association with Codebase IIIT Kota. This event on Devfolio promises a monumental experience, fostering innovation and collaboration. Participants can choose between the Blockchain Track, delving into decentralized applications, or the Open-to-All Track, allowing freedom to explore any domain. Beyond a coding competition, HackTheChain is an opportunity to network, learn, and win exciting prizes. Join us for a weekend of coding, creativity, and community development.

Prizes

The hackathon will have a total of three winning teams in the Open to all track. Additional prizes from our sponsors for the Web3 track as well. The winners will receive exciting goodies, swags, and much more to celebrate their victory.

In addition to these rewards, we also offer cash prizes worth up to Rs. 10,000 for the winning teams. But that's not all! We're also giving out free vouchers for various courses to help participants continue their learning journey.

For more information about these prizes and other details, please visit our website at <https://hackthechain2.devfolio.co>
